

Pro Classification Report

Single-run export for the selected Pro model comparison.

Dataset: simulated_binary_data.csv

Target: binary_value

Detail model: Tree model

Summary: accuracy 0.812

Dataset Metadata (1-12 of 21)

Field	Value
Generated	2026-06-25 16:50:07
Run time	2026-06-25 16:43:43
Report type	Pro classification
Dataset	simulated_binary_data.csv
Rows	0
Columns	5
Target	binary_value
Predictors	float_value_1, float_value_2, float_value_3, float_value_4
Models compared	Logistic regression, Tree model
Detail model	Tree model
Test split	20%
Cross-validation	5 folds

Dataset Metadata (13-21 of 21)

Field	Value
Missing values	Drop incomplete rows
Categorical encoding	One-hot, drop first
Feature scaling	On
Split seed	417117
Outlier handling	None
Probability calibration	Off
Hyperparameter tuning	Grid search
Random search iterations	10
Decision threshold	0.500

Explain This Run (1-5 of 11)

Section	Item
Recommendation	Recommend Logistic regression
Summary	Logistic regression is recommended by the comparison ranking; the panel below currently explains selected detail model Tree model.
Why this model	The selected detail model is not the top-ranked model; Logistic regression ranked best in the comparison.
Feature interpretation	float_value_1 is one of the strongest drivers by model importance (0.759).
Feature interpretation	float_value_4 is one of the strongest drivers by model importance (0.098).

Explain This Run (6-11 of 11)

Section	Item
Feature interpretation	float_value_3 is one of the strongest drivers by model importance (0.088).
Warnings	The selected detail model is not the top-ranked model; Logistic regression ranked best in the comparison.
Warnings	Hyperparameter tuning did not materially improve test accuracy.
Next actions	Inspect Logistic regression as the detail model before finalizing.
Next actions	Adjust the decision threshold to balance precision and recall for the use case.
Next actions	Review feature importance or coefficients for plausibility before sharing the report.

Selected Detail Metrics

Metric	Value
