

Pro Classification Report

Single-run export for the selected Pro model comparison.

Dataset: simulated_binary_data.csv

Target: binary_value

Detail model: Tree model

Summary: accuracy 0.812

Dataset Metadata (1-18 of 21)

Field	Value
Generated	2026-06-25 16:47:37
Run time	2026-06-25 16:43:43
Report type	Pro classification
Dataset	simulated_binary_data.csv
Rows	0
Columns	5
Target	binary_value
Predictors	float_value_1, float_value_2, float_value_3, float_value_4, category_with_a_much_longer_name, another_predictor_name_that_should_wrap
Models compared	Logistic regression, Tree model, Random Forest, Gradient Boosting
Detail model	Tree model
Test split	20%
Cross-validation	5 folds
Missing values	Drop incomplete rows
Categorical encoding	One-hot, drop first
Feature scaling	On
Split seed	417117
Outlier handling	None
Probability calibration	Off

Dataset Metadata (19-21 of 21)

Field	Value
Hyperparameter tuning	Grid search
Random search iterations	10
Decision threshold	0.500

Selected Detail Metrics

Metric	Value
Test accuracy	0.812
